DSC Pump Fault, 2005 - 2014. This is a very common failing ABS pump for most BMW vehicles built between 2005 & 2014, the common symptom is illumination of the ABS, DSC and handbrake warning lights. When diagnosing the fault, you will find fault codes stored of 5DF0 & 5DF1 which blame the hydraulic pump motor.

ABS System Parts for BMW Z4 for sale
| eBay

The ABS pump/module is located on
the drivers side, towards the back of
the engine bay under the brake servo.

Where To Download Bmw Z4 Ate Abs Pump 3452

Although the the pump looks relatively easy to access from the top of the engine bay, there are obstructions including the brake lines, which would make it very difficult to lift out this way.

Find Used BMW Z4 ABS Pump, Sensors and Module Parts Here

If you replace the pump, you must go through the BMW pump flush protocol which assures no air bubbles in the ABS section of the brake lines. You must have proper software to do this. Before you do anything, I would advise pulling all the codes from the car that are related to this problem and see if it might NOT be the ABS pump or controller.
