3.5.1 release, which builds on the 3.5.0 release with many bug fixes.

Mule ESB | MuleSoft Blog - Part 3

An Enterprise Service Bus (ESB) is fundamentally an architecture. It is a set of rules and principles for integrating numerous applications together over a bus-like infrastructure. ESB products enable users to build this type of architecture, but vary in the way that they do it and the capabilities that they offer.
