How We Know What Isn't So is a researched book on social psychology by Thomas Gilovich, a psychology professor at Cornell. It talks about why our mind seeks dubious or erroneous information to aid our biases, rather than negating or clarifying them, and supplements its claims by examples of researches that did so in the past.

**How We Know What Isn't So (2013)**  
We know something is true if it is in accordance with measurable reality. But just five hundred years ago, this seemingly self-evident premise was not common thinking. Instead, for much of recorded history, truth was rooted in scholasticism. We knew something was true because great thinkers and authorities said it was true. At the insistence of ...

**How Do We Know What Is True? | RealClearScience**  
There are several different ways that we know what we know, including informal observation, selective observation, overgeneralization, authority, and research methods. Research methods are a much more reliable source of knowledge than most of our other ways of knowing.
