As far as I know, IH balers up to the 47 were the only ones to use the McCormick knotter. And IH traded on it: you can see the word McCormick above the International on the sticker on the plunger crank cover in the photo. They had two twine discs, over-centre keeper blade (for the 47 they added a spring-loaded keeper blade), fixed twine knife.

International Baler Parts | 47 | All States Ag Parts

But if I changed gears, up or down, my IH 47 would miss knotting on two bales. If I touched the clutch in any way, the baler knew it and dumped two untied bales. That was on the days it was running right. But if you have lots of baler timing and knotting experience and money for parts, no reason you can't make some hay.

overall width of IH 47 baler | Homesteading Forum

I think the 440 is a mid 70's baler and my understanding it came after the model 47 baler. For a long time, I assumed IH (and MF) balers were not so good - lots of kottter troubles. However in just reading about these balers, if properly adjusted, will pound out a very nice square bale all day/season long.
