These three pan conveyors type KZB transport the clinker to a 600tph pan conveyor which operates as a collector and takes the clinker on to feed the mill. The connection of the silo to the clinker production process is assured by a pivoting pan conveyor with a centre distance of 78m and a capacity of 474tph, which was originally supplied by Aumund in 2008 to feed eight smaller clinker silos.

Pan Conveyors Automated manufacturing processes in most cases require stockage or blending of raw materials, additives and intermediate products. Rapid and reliable availability play an important role here. Bottlenecks in the loading or discharging of bunkers, stores, tips and silos can compromise the efficiency of the installation.
