PI 012-3 Page 5 of 11 25 September 2007 8.3 CLEAN ROOM FITTINGS AND SURFACES 8.3.1 All fittings, such as power outlets and light fittings should be flush with the wall or ceiling surfaces and sealed to prevent entrainment of unclean air. Surfaces should be smooth and impervious to the cleaning agents used.

PI 012-3 Recommendation on Sterility Testing

goes up as the number of products sold goes up. This is illustrated in Figure 3. A business can predict variable costs only if it can make a fairly accurate estimate of what its sales volume will be. This is easier for an established business than for a new business because the established business has past sales figures to use as a guide.
