Physics: Static Electricity. 1) What is static electricity? 2) True or False: Static electricity constantly flows in the same direction. 3) What two atomic particles make up the nucleus of the atom? 4) What atomic particles move from one surface to another in order to form a static charge?

Science Quiz: Physics: Static
Electricity

Static electricity is due to electric charge that builds up on the surface of an insulator, such as a plastic comb. The charge that has built up cannot easily flow away from the insulator, which is why it is called static electricity. What causes static electricity?
