[ISBN-13: 978-1-4160-5897-7. Three major radiation oncology textbooks have become reference library staples. Oncologists have come to know these books simply by the editors' names—Leibel and Phillips, Perez and Brady, Gunderson and Tepper—bestowing on them a nearly iconic status. The first edition of the Textbook of Radiation Oncology, published in 1998, was soon followed by a second \(2004\), which, owing to its unparalleled ability to concisely and thoroughly present the key topics of ...](#)

5.0 out of 5 stars Textbook of Radiation Oncology Reviewed in the United States on March 13, 2006 Excellent text covering all major tumors encountered in radiation oncology practice. Very good reviews of data and most importantly a recommendation.

Amazon.com: Customer reviews: Leibel and Phillips Textbook ...

Leibel and Phillips has consistently been favored by radiation oncology residents as their textbook of choice for many reasons. That is not the goal of this review, however. I bought the kindle version of the textbook. I was absolutely shocked that the kindle version lacked countless figures and tables that are essential to the text.

Leibel and Phillips Textbook of Radiation Oncology - E ...

The impression the reader takes is that there is gross negligence running rampant throughout Radiation Oncology departments as a matter of course. The article fails to mention the quite rigid quality

assurance regulations in place for hospitals and physicians at the state and federal levels. This is a highly regulated field- not one of no ...
